## CONTENT

**Part I — Subject Index**

The index includes all articles that have appeared within the dates covered, with the exception of certain Briefs (such as Labor Briefs, Careers) and Obituaries.

The subject headings under which all articles are indexed appear in alphabetical order. Within the subject headings the entries are listed chronologically.

Many important headings are divided into subheadings, for example, BRIDGES — by states or countries; CITIES — by name; BUILDINGS — by type (churches, garages, etc.).

International coverage is shown under the letter "I." The items here listed geographically also appear under the appropriate subject headings.

**Part II — Names**

Part II of the index contains names of authors, personalities, and companies. Listed here are the names of people who are the subject of articles; names of authors of by-lined articles and published letters; and names of firms about which articles were written.

Individuals or firms simply mentioned in feature articles about various construction projects are seldom indexed by name. Those, on the other hand, who are listed under **Names** will usually not appear under the subject heading. For example, an article about the Smith Construction Co. appears only in the **Names** section and will not be found under the heading CONTRACTORS.

**Part III — Product Manufacturers**

Items that describe new materials and equipment, including Product Briefs, are indexed under this heading, by manufacturer's name.

## TERMS USED

**See** means that all entries on the subject will be found under another heading: EXCAVATING, **see:** SOIL.

**See also** means that a related heading should also be checked: SEWAGE, **see also:** WATER POLLUTION.
